

APPENDIX D: Some Sample Pages From a Survey Typeset in T_EX

This appendix consists of T_EX output for several selected pages of a survey recently conducted by a University of Oregon graduate student. It is included as an example of how to use T_EX to typeset typical survey instruments.

A machine-readable copy of the raw T_EX commands used to typeset these pages is available to OREGON VAX users as:

```
TEX$DISK:[TEX.SAMPLES]SURVEY.TEX
```

On other systems get a copy of that file via anonymous FTP.

FTP to DECOY.UOREGON.EDU (128.223.32.19) and see directory `pub/tex/samples`.

THE TOURISM INDUSTRY

6. TOLERABLE REDUCTION IN TOURISM INDUSTRY JOBS: The tourism and recreation industries provide about 21,500 direct jobs and 20,300 indirect jobs in Oregon.

Assume that in order to maintain current timber harvest levels, a certain percentage of those tourism and recreation jobs may get eliminated.

What percentage of tourism industry jobs would you be willing to eliminate (if necessary) in order to maintain the current timber harvest levels?

0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

MAXIMUM TOLERABLE REDUCTION IN TOURISM INDUSTRY JOBS

7. TOLERABLE TOURISM INDUSTRY HOME FORECLOSURES:

Elimination of tourism and recreation jobs in Oregon would probably have a number of economic consequences, including increasing the number of tourism and recreation industry employee home mortgages which fail.

What percentage of tourism industry home foreclosures would you be willing to accept (if necessary) in order to maintain the current timber harvest levels?

0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

MAXIMUM TOLERABLE TOURISM INDUSTRY HOME FORECLOSURES

8. SPENDING FOR DISPLACED TOURISM WORKER SUPPORT: Assume that some people formerly employed by the tourism industry would be unable to find new work, if tourism and recreation jobs are reduced.

It has been proposed that tax money could be used to help support those displaced tourism and recreation workers until they could find new work.

How much extra would you be willing to pay next year (in Oregon income tax) to **directly support** tourism and recreation industry workers who can't find new jobs?

\$0 \$25 \$50 \$75 \$100 \$125 \$150 \$175 \$200 OTHER: \$ _____

9. SPENDING FOR DISPLACED TOURISM WORKER RETRAINING:

Suppose the people who might lose their tourism and recreation industry jobs needed retraining in order to be able to find new work. Assume that this sort of retraining expense would be paid for via an increase in Oregon's income tax.

How much extra would you be willing to pay next year (in Oregon income tax) to support **retraining** tourism workers who can't find new jobs?

\$0 \$25 \$50 \$75 \$100 \$125 \$150 \$175 \$200 OTHER: \$ _____

THE ENVIRONMENT vs. TIMBER JOBS
